I love to build projects that can bring amazing experiences to the users. I like to stay in touch with technology every single part of my day and learn new things every day. My current stack are React, React Native and Node using Js or Ts, but I am flexible to learn anythig to solve a new challenge.

Experience

Freelancer
No Terraço Restaurante   **Jan, 2022 – Jul, 2022**
Builded a virtual menu for No Terraço Restaurante (a local restaurant). The api was developed in node using mongodb as database and hosted at heroku. Front-end was build using React and current is hosted at vercel. Along this, I have build a mobile app for the restaurant owner manage the visibility of the itens at the menu.

Formação
